Claimfx

ELECTRONIC CLAIMS MODULE

Every day medical office managers find themselves swamped. Endless calls to and from insurance companies and imposing stacks of claims make you wonder how you can improve the productivity of your office staff. Now there is a way to take back your workplace. CLAIMfx allows you to simplify your office workflow, saving you precious time intended for patients. We enable you to more quickly resolve insurance issues with our rapid claims process so you spend less time in follow-up. This means more money to your bottom line.

Powered by the nation's second largest clearinghouse, CLAIMfx makes electronic submission of claims quick and easy without duplicate data entry. CLAIMfx is network compatible and interfaces directly with MEDfx Corporation's practice management software MEDfx to submit claims electronically. Because MEDfx is web-enabled, with one click claims are on their way to payers across a secure transmission environment.

Comprehensive Claims Tracking

CLAIMfx utilizes a web-based claims transaction management tool enabling us to assist providers in managing accounts receivable with access to clearinghouse and payer reports.

And, now customers can call our Technical Support Department for all their claims issues, providing one source for all their claims questions with real-time claim status and history, often eliminating time consuming calls to payers.

Flexible Payment Plan

Now you can select your payment options. Customers can choose from a discounted flat fee solution*, paid annually per provider or monthly billed per provider fee. Per claim paper claims are also available.

> "Insurance claim payments are so much faster with MEDfx and CLAIMfx than with my legacy product."
>
> **Sue Haas**, Office Manager, Chicopee, MA

> "With CLAIMfx, our claims submission is working out really well and we get faster payment of claims."
>
> **Laurie Maritato**, Office Manager, East Moriches, NY
